

## Case Study

GenAI-enabled deposition summary analysis

# Benefits of shifting to a genAI-enabled deposition summary delivery model

## Client

Personal injury law firm.

## Challenge

Firms traditional approach to deposition summaries lacked ability to scale, standardized processes, centralized quality control, and a tech platform designed for large volume hosting and review.

## Solution

Analyze the cost, resources, and time required for deposition summary using three different delivery models to determine and quantify impact.

The following provides the evolution and an overview of each of the three models for handling deposition summary.

	1.0 Traditional Law Firm Model	2.0 Legal Process & Tech	2.1 GenAI Enabled Discovery
	<ul style="list-style-type: none"><li>• Small non-dedicated paralegal team (2-3)</li><li>• Inability to scale to meet project needs</li></ul>	<ul style="list-style-type: none"><li>• Dedicated team of 8 attorneys + project management</li><li>• Scalable global team leveraging lowcost delivery</li></ul>	<ul style="list-style-type: none"><li>• 1-2 senior attorneys to QC first level results from GenAI model + PM + GenAI tech SEM</li><li>• Increased scale and further reduction to cost / effort</li></ul>
	<ul style="list-style-type: none"><li>• No standard process, training, or calibration</li><li>• No centralized Quality Control</li></ul>	<ul style="list-style-type: none"><li>• Documented review playbook / protocol</li><li>• Established Quality Control mechanisms</li></ul>	<ul style="list-style-type: none"><li>• Standardized prompt protocol and GenAI output</li><li>• Human QC from senior SMEs and model fine tuning</li></ul>
	<ul style="list-style-type: none"><li>• Tech platform not designed for large volume hosting &amp; review</li><li>• No keyword search or analytics</li></ul>	<ul style="list-style-type: none"><li>• Secure 24/7 global platform designed for large scale data hosting and review</li><li>• Platform analytics, machine learning, and advanced search</li></ul>	<ul style="list-style-type: none"><li>• GenAI leveraged multiple LLMs including Open AI and Anthropic</li></ul>

## Results

The efficiency gains and cost savings realized from a tech-enabled deposition summary model.

	1.0 Traditional Law - Associate	1.1 Traditional Law - Paralegal	2.0 Legal Process & Tech	2.1 GenAI Enabled Discovery
Review Hours	2,000	2,000	1,500	25
Duration (Days)	160	160	28	16
Team Size	3	3	8	6
Time Reduction	Baseline	None	630 (25%)	1,038 (66%)

### Takeaway

When compared to more traditional models, incorporating genAI technology to handle deposition summaries reduces the time to complete by **66%** and cost by **75%-90%** depending on attorney and paralegal hourly rates while also providing standardized prompt protocol and human QC from a senior Integreon reviewer.

## Integreon document review services

Technology-enabled, unparalleled expertise, and cost predictability When faced with litigation, disputes, arbitration, investigations or due diligence, there are many unknowns. Your review processes and cost should not be a source of concern. Corporations and law firms around the world choose Integreon as their go-to review services partner.

With 3,500+ employees and delivery centers on three continents, Integreon can handle any size review project, anywhere. We can deploy onshore, offshore, or multi-shore resources using a “follow the sun” model to meet your deadline and budget needs.

Integreon’s range of review services include:

- ECA and Search Term Optimization
- First and second level review
- Audio, media and chat review
- Redactions
- Privilege review and privilege log
- Unitization & Objective Coding
- Witness & deposition preparation, trial support
- Chronologies, summaries & dramatis personae
- DSAR Support
- Law Firm Process Optimization and Improvement
- eDiscovery Consultancy and eDiscovery Services (powered by our trusted partners)
