

## Data Migration & Abstraction Services

# Transform your data with the power of generative AI

### Automated extraction

Companies operate on a floating platform of contracts, legal and compliance documentation. The information locked within, and about, those documents is typically held in an unstructured or semi-structured form. Transforming the data into useful business insights cannot be done at speed and scale without the use of machine learning and automated extraction technologies. Leveraging ContractPodAi's Leah Legal Copilot, Integreon augments traditional data migration and abstraction (DMA) services with the power of generative AI.

### Human intelligence

The challenge of transforming critical documents into actionable data cannot rely on technology alone. Integreon's years of experience in DMA has shown that while AI offers dramatic advancements in the accuracy and speed of data extraction, the tools still require human input, quality validation, training and support by professionals with the right expertise.

Our DMA solution brings together deep understanding of the technology suite alongside the skills and resourcing that will deliver success. Using and adapting Leah's out-of-the-box functional modules, Integreon deploys expert teams to support large-scale contracts repository migrations, and to manage data extraction and deliver powerful reports and analytics for a wide range of digital transformation projects — from M&A due diligence to massive remediation programs for contract estates that need to be updated, harmonized or consolidated as a result of corporate restructuring or specific regulatory change events.

### Organize, comply, enhance

Integreon DMA brings control, visibility and value to the corporate estate of legal documents:

- Offline contracts are digitized and brought online into an organized structure
- Key data are extracted for analysis — metadata (information about the contracts, deleting redundancy), important clauses, obligations, service level commitments, pricing information etc.
- Contracts can be classified and sifted for ease of access and multiple commercial perspectives
- Contracts transparency will drive legal risk and compliance management initiatives
- Estate defects become easy to fix, tackling duplication, outdated information, unsigned documents and lack of harmonization.

## Dedicated expertise

Integreon DMA is available to support standalone legal optimization projects and rolling transformation programs, whether for individual business units or across the enterprise. With a global delivery center infrastructure, our support teams offer expertise balanced by cost-efficiency. Our teams will:

- Conduct an extensive pre-flight review to sift duplicate, unsigned or partially signed documents
- Sanitize the data and apply standardization protocols
- Design a sophisticated, practical abstraction and testing procedure

## The power of generative AI

Employing Leah Legal Copilot, Integreon DMA offers data migration and abstraction support that can deliver results quickly, accurately and at massive data scale:

- We manage the deployment of the tool and its various modules
- Our support teams have the experience to design and implement efficient processes that can comfortably handle large data volumes
- Strict quality assurance and control systems are applied at every stage of delivery
- The solution is designed for easy integration with different client data processing systems

This is what Leah delivers

### Smaller teams

Leah empowers our associates to do more with lower headcount

### Faster delivery

Review and summarize massive volumes of documents and data at lightning speed

### Better accuracy

Leah offers incredible accuracy rates while our subject matter experts provide quality assurance

## Delivery infrastructure

- Eight delivery hubs across 3 continents
- Highly trained legal professionals, managed to tight SLAs
- 50+ languages supported
- GenAI-enabled delivery at every location
- 25 years of operational support for legal and business functions
- Flexible SME model deployed from in-house, law firm or Integreon team

## A suite of Leah modules

- **Leah Extract:** extract key information at incredible speed
- **Leah Discovery:** deep analysis across vast document estates
- **Leah Guidance:** AI-powered legal helpdesk, responding quickly to document queries in natural language

## Cost-effective capability

Integreon DMA can match the capabilities of any service provider in the industry, big or small, with highly competitive price packages and Leah licensing bundled into the solution.

## Transform your data for maximum contract value and risk mitigation with Integreon DMA: compelling use cases

### CLM data migration

- Review and transfer of thousands of documents into new CLM platform
- Managed deployment of Leah Legal Copilot
- Dedicated onshore or offshore legal teams

### Due diligence & post-merger integrations

- Key data abstraction across multiple entities and contract types
- Ability to scale up review teams at short notice
- Secure offshore and work from home models available, enhancing timezone agility and driving down price

### Compliance programs

- Fast, accurate extraction of relevant contract provisions, organized by client risk prioritization
- Intuitive dashboards provide at-a-glance overview and insights
- Protocols prepared in advance to support next stage contracts

**Exploit your contracts data cost efficiently, at scale and speed.**
