

Meaningful, actionable insights, as well as peace of mind and a **competitive edge**

270+

researchers and information data specialists

100K+

requests delivered annually

Integreon brings tech-enabled processes and a team of tenured researchers to consistently deliver the insights you need to grow and protect your business. Based on the way you like to work and your specific needs, results are packaged for ease of use and clarity.

Services can be delivered round the clock, from Integreon's global resources on a project or on-going basis. Integreon research and analytics services include:

Compliance research

- Complete know your client (KYC) due diligence for politically exposed persons and medium and low risk new and existing clients
- Anti-money laundering (AML) screening and discount false positives for new and existing clients
- Client due diligence to verify if they are subject to sanctions
- Complete know your vendor (KYV) profiles
- Anti-corruption analysis
- Screening for unusual transactions
- Case and legislation search and tracking

Business research

- In-depth analysis including overview of company strategy, challenges, SWOT, and financial analysis
- Competitive analysis using customized analytical frameworks and methodologies
- End-to-end market analysis including sizing, forecasting, outlining issues, challenges, and key players
- Benchmarking analysis for organizations, industries, products, and services

- Best practices and case studies for a particular sector, industry, or service
- Research support for proposals

Environmental, Social, and Governance (ESG) research

- Research on specific ESG issues including quantifying exposure to high-risk industries (energy, firearms, palm oil, gambling, fur etc.) or countries
- Collection of disclosures on greenhouse gas emissions (GHG intensity and type, etc.), carbon neutrality targets (net zero goals and performance against them) and carbon footprints (energy consumption, Scope 1, 2 and 3 disclosures, real estate holdings, etc.)
- Filtering and classification of news articles to identify potential ESG issues and requirements (oil spills, product recalls, director malfeasance, lawsuits, etc.)
- Managing database information on companies' management through news reports (appointments and removals, AGM minutes, etc.)
